#770 Head and Jamb Protection INSTALLATION INSTRUCTIONS

- 1 Close the door and measure the frame opening.
- 2 Install the gasketing (trim as necessary), head piece first. Place the piece against the face of door, making gentle contact between the rubber extrusion seal and the door. Fasten in place.
- 3 Place hinge side piece against the face of door, making gentle contact between the rubber extrusion seal and the door. Fasten in place. Repeat the same procedure with the lock side.
- 4 It is recommended that this gasketing product be set in a bead of caulking to ensure the integrity of the seal and prevent additional sound transmission.
- 5 Adjust the #770 with the adjustment screws as necessary for the desired seal and operation of the door.

Typical Mounting of Automatic Door Bottoms

● Surface-Mounted

● Semi-Mortised

● Mortised

How To Install:

- 1 All surface and semi-mortised units must be mounted on the push side of the door stop (side where the door stop is).
- 2 The brass adjusting nut must be on the hinge side and should not be adjusted until the unit has been mounted.
- 3 Leave 1/16" (1.6) clearance on each end.
- 4 Optimum clearance between door bottom unit and floor or sill is 3/8" (9.5).

TRIMMING INSTRUCTIONS

IMPORTANT!

Push insert as far as possible to the opposite end of the housing from the adjusting nut, before cutting.

FINAL ADJUSTMENT

After unit has been mounted, turn adjusting nut in / out until closing door pushes neoprene seal down to make contact with floor/sill.

#119B / 119WB / 119WS Bronze Cushion Spring INSTALLATION INSTRUCTIONS

Before Installation :

- 1 Thoroughly clean the surface of the frame where gasketing is to be applied (see drawings). Use either a solvent cleaner (such as mineral spirit) or a common detergent cleaner. Make sure to check for any impediments (dust, dirt, oil, grease, loose paint, etc.) and remove them from the surface area.
- 2 Allow surface area to dry COMPLETELY before beginning installation.
- 3 Recommendation: Finish-paint doors and frames and allow the paint to dry before installing the gasketing.

How To Install :

- 1 Install the head piece first along the entire length of the head. Measure and cut the gasketing to size and place properly, referring to drawings for location on the head. Remove the paper backing from the self-adhesive strip (PSA), align on the head and press firmly into place.
- 2 Install the strike jamb gasketing next, following procedures as outlined in step 1. (Refer to drawing for placement on the strike jamb.)
- 3 Install the hinge jamb gasketing last, following procedures as outlined in step 1. (Refer to drawing for placement on the hinge jamb.)
